

Spark M-20 Data Spreadsheet

Before using the spreadsheet the macros must be activated since they are blocked by default in windows.

Follow the next steps to activate the spreadsheet:

1. Copy or move the "AlivionSpreadsheet_M20_EN.xlsm" to where you would like to store your data.
2. Right click the spreadsheet file. Select "Properties". In windows 11, select "show more options", then "Properties".
3. In the file properties in the tab "General" at the bottom section "Security": Make sure that the "Unblock" box is checked. Then click "OK" to confirm.
4. In your Excel file a yellow bar will appear at the top. Click "Enable Content" to edit the file.
